## GIRL RELIVES UFO TERROR

Full story inside

● Caroline Muncey with her drawing of the UFO she claims terrorised her.

# EDITORIAL

From the Editor, Edward Harris (right)

THIS IS THE LAST ISSUE OF COSMOLOGY NEWSLINK. I hope, like all editors, that as it is our finish, it will contain NO mistakes of any kind. I aim not to rush this issue, which is a double one owing to the lateness, so will take my time on it, even if you do not get it until end of August.

Why is this the LAST issue? Mainly due to severe cut-backs in finance. CNK is funded out of my own pocket, and the subscriptions, of which there are only a handful, only pay the cost of postage for ONE or TWO issues. Now my 'pocket money' has run out. There is NO chance CNK may be restored. Please see page 37 for newflash! CNK has ceased publication now and the end of December, as planned. We have really ceased

During the past ten months I have been on a training course, brushing up my English & Maths. I hope the brushing up on my English SHOWS in this issue. Talking about spelling mistakes and typing slips, I was appalled at these in my mini-encyclopedia 'OUR WEIRD UNIVERSE'. Shame on me. Likewise for earlier issues of CNK.

Cosmology is a serious subject, and therefore we must give space to more than just UFO sightings and data, so you will see with this issue, I have attempted just that. However, anything not found in CNK after closure, will be included in the second volume of 'OUR WEIRD UNIVERSE.'

I thank all readers for their past support, and wish them every good fortune for the future.

Edward Harris

Edward Harris. Editor

## CHARIVARI - A POT POURRI OF ODDS AND ENDS:

THIS ISSUE has no contents, no introduction in 4 languages, and will be a Charivari of all kinds of material.

SPACE AGE FASHION BEAUTY CONTEST. This has been a dead duck at the moment. OK then, so the fee is too high. Will 75p be ok? The photos of the girls so far taken are now being developed..... GENE DUPLANTIER of Canada has just produced a weird booklet, in fact, we were about to run a series on it ourselves and have our own files on it. The book is called 'THE NIGHT MUTILATORS' and concerns the strange mutilations of cattle and other animals. In his forward on page 3, he says: 'In one estimate, over 7,000 cases of cattle mutilations were found, in the U.S. since 1975! The cows had also had parts from their bodies removed in such a strange surgical manner that vets there just could not explain it. One vet said: "It may cost us our lives, but one day we will get to the bottom of this mystery." If you want a copy, in case CNK closed and cannot then run the articles, this book is a must. It is believed that UFO's are the cause of the killings, and one in particular known as 'big mamma'. To get hold of a copy which had maps, photos and drawings of the data on this, write now to: GENE DUPLANTIER, (enclosing \$2.95, or English Equivalent) 17, Shetland Street, Willowdale, Ontario, CANADA, M2M 1X5., and may you be as perplexed as the rest of us at this horror..... A small booklet called 'A FLIGHT TO THE LAND BEYOND THE NORTH POLE or IS THIS THE MISSING SECRET DIARY OF ADMIRAL RICHARD EVELYN BYRD?' with a forward by Dr. Wm. Bernard D.D., PH.D. is about the hollow earth story and discoveries and photographs of the said admiral, of what he saw. Details from: Ivan Boyes, 1339, Festavon Court, Mississauga, Ont, L5H 1J7. For Canadian readers, Telephone: 416-823-2392..... Ken Rogers of 47, Belsize square, London, NW3 wrote asking CNK to announce a Holiday/Weekend accommodation now available for skywatchers and UFO researchers. s.a.e for details to the above address..... A letter from John Barklam of FORESIGHT magazine dated 18th august 1978 asks CNK: "It would certainly help us in our enquiries about the programme ALTERNATIVE THREE, if we can find someone who has a video tape recording of the programme as it is impossible to get hold of a copy through the T.V company or even a transcript of the programme." Has any reader a copy of the programme which will help? To J. Barklam, 29, Beaufort Ave., Hodge Hill, Birmingham, B34 6AD. England.

CHARIVARI, continued:

**LAURA MUNDO CRITISED.** Laura Mundo, editor of the MUNDO Monitor has come under criticism for the umpteenth time. This time, from Ores Wilson of Reading, U.S.A. he wrote in 1978: "Well Laura is still criticising my 4thbdimensional research and "psycho" study. She is living in the past with the findings of George Adamski. She is indeed one of the few pioneer UFO researchers and made a great sacrifice to teach the subject so we give her credit for her awareness and interest in UFOs. Adamski was just the thing around 1958 but not in 1978, things have changed and new info has been given to all. He sure did have the wisdom and truth and the best photos of them all.

Jimmy Carter (above) saw a UFO himself some years ago and filled in a UFO sightings form. For reasons only known unto himself, he has to forsake this one election promise. Is this for the good of America and the rest of us? Only he knows. Mundane items outlined DOES keep our eyes off of the 'threat from outer space! -Editor

"President Carter still did not release all the Gov't UFO info that he promised to do. He has too much trouble with Israel, USSR, inflation and energy. Prices continue to rise, rents go up, food goes up and thus we have more robberies than ever, each night of the week.

"This is all to end in 1982, when the 12 planets come into perfect alignment and the space ships descend to Earth and take over the planet at last. Pollution will be removed in 1982, the great year, the end." ORES WILSON, Reading, Pa. USA

\*sorry for the typing slips folks, I'll leave some in for posterity! and the humpur. -Editor.

**CLOSE ENCOUNTERS OF A KIND**

News clip with "Times" scribbled on it, 12th March 1979.

Is it possible that a cigar-shaped object descended over the tiny town of Aurora, Texas and crashed into Judge J.S Proctor's windmill? And that a tiny spaceman was buried in their cemetery?

That was the tale sent to newspapers in Dallas and Fort Worth one April day in 1897 by a local correspondent. Most citizens of Aurora still scoff. "Hayden wrote it as a joke and to bring interest to Aurora" says Etta Pegues, 86. "The railroad bypassed us, and the town was dying." But UFO stories, told and retold, sometimes acquire a life of their own. Over the years some of the faithful have been trekking to Aurora to search for the small spaceman's grave. "Sometimes they take souvenirs, and a couple of years back somebody stole the spaceman's tombstone," says H.R. Idell, the town Marshal, referring to a big rock with a mysterious looking crack in it. "But mostly folks just poke around in the ruins."

Mrs. Pegues is scornful. She says: "People wish so hard the story was true they really start believing it. Why, the judge never even had a windmill?..... CNK has awarded JENNY RANGLES OF NUFON THE CERTIFICATE OF RECOGNITION, for her task in bringing the serious nature of UFO research to public notice, a hard and unrewarding task indeed. Jenny has just written a book, to be released soon. CNK will review if a copy is sent, as we did ours, Thanks... CNK will be awarding the same certificate to LAURA MUNDO of the USA soon for work also of the same nature.....

SOVIET TRU MPH

Report from the NOVOSTI press agency: By Leonid Staroselsky (an apt name for this subject eh?)

SOVIET Cosmonauts Vladimir Lyakhov and Valeri Ryumin completed a record 140 days in space on Sunday (Report dated July 16th, 1979). It seems that in the not too distant future we shall witness continuous space flights which will be made by chancable crews. At any rate, this practice is needed for the establishment of space factories.....

**DO YOU REMEMBER? FLASHBACK!** January 11th 1978 was the Link-Up between Apollo and Soyuz. ....**HAVE YOU HEARD THAT FUNNY HUM?** (News of the World, 19-2-'79): A HUMMING noise that is upsetting people all over Britain-especially at night-is to be discussed in Parliament. (CNK says: I wonder what the outcome was).

**DU-PLUS STENCILS** 42, Victoria Street, Braintree, Essex.  
IS YOUR MAGAZINE LOOKING DOWN IN THE MOUTH? Then give it a face lift with electronic stencils cut professionally by Mr. Tony Annereau. Every photo is CNK was cut by him, except on pages: 22, 24, 26, 27, 37, & 43, which were made elsewhere. Why not take advantage of seeing YOUR magazine improved. Write now!

COSMOLOGY: CNK TAKES A NEW LOOK AT AN OLD SUBJECT. WHERE  
IN ALL THE COSMOS HAVE WE COME FROM? Is the following the

# ORIGIN of MAN

By the Editor, Edward Harris

Out of all the bones dug up since the scientific people have began to think about it. Where on earth are bones of GIANT human beings? We have the bones of other great animals, like the dinosaurs. No, I am not about to step on someone else's theories, just to add that question. But, there are still a few questions to be asked.

SOMETIME AGO, while pondering the subject, I came up with my own hypothesis into WHERE WE ALL CAME FROM! There was a point in time, I am sure, when man, that means all mankind, just did not THINK, did not have REASONING power. Now, due to a recent TV programme, and indeed, one earlier by James Burke of BBC television fame, I came up with this new look at the old subject of 'Where do human beings come from?' I certainly hope that if anyone in establishments read this, they might be able to either pour cold-water onto the following, or do more research into it and back it up.

At last, I can see a clearer picture emerging. The answer seems to me quite logical. That answer lies in the very word 'NATURE' itself, and if we can determine what this means, then 'NATURE' holds all the answers to life on Earth.

During recent scientific investigations in this last century, startling evidence has come to light which points the finger in the direction of biological systems. We all have a smattering of knowledge about the DNA molecule, and those amino-acids, and other forms of early biological life in which makes up all life forms on Earth. So far, it seems, micro-organisms, controlled by their atomic structure, have had it pretty well all their own way. Each biological system has been governed by its atomic assembly and biological formations, for millions of years. In this

way, for example, the common ant is millions of years' old and the structure of its body has not altered in all that time. This was recently discovered when fossils bearing the imprint of an ant was found, and it was unchanged.

However, now we come into the part where sometimes nature does 'go astray'. Some chemical and biological change takes place and a NEW species is produced. Is this then not evolution? It may well help to play a part in it, despite what some religious groups may say about it. They argue against it. Yet the ant discovery also proves that they are ALSO right. Therefore we have the evolution theory and those against it, side by side, due to a biological 'freak'. Due to these freaks, then, evolution could occur, or maybe the word evolution should be REPLACED by the word METAMORPHOSIS. That would settle the argument once and for all. But, I am sure that due to biological freaks of nature, a metamorphosis DOES and WILL take place.

To back up the statements on the last paragraph, there appeared on British Television, B.B.C. 2, May 1979 in a programme called 'HORIZON' a documentary film called: 'THE FIGHT TO BE MALE'. In this documentary we saw how a series of biological 'accidents' down through the ages, in a race of people in a Pacific Island, which was un-named, a group of girls changed to boys, and stayed that way. Of course, medical science is always around to 'cure' what nature never intended when it comes to homo-sapien, because if it did not, then eventually these freaks of nature in humans would lead to a strange mixed up species indeed after a few centuries. Again, we saw what happens when cells do not do their job properly. In one case, there was shown an Hermaphrodite person, which is a very rare case, but in fact there are a few around. This is a half man and half woman. Surgery corrected the problem, however. It was an unbelievable sight, for those who saw it. This was supposed to have happened in South Africa. This person was made male.

Now, the purpose of this article was to draw attention to the last paragraph. If these accidents can happen due to a biological battle inside a human being, I believe it MUST have occurred eons ago when our planet Earth was in the

process of metamorphosis. Therefore, it is probable, even certain, that humans were a biological accident, whether it occurred on this planet or another, as some ufologists believe. In fact, if life in human form does exist in the universe, then it still must have been a biological 'mistake' which created it, from whichever construction it was made from.

Scientists have been looking for the 'missing link' for as long as I first heard about it. I think they are still trying to find it. This 'missing link' was supposed to be at an age in our primordial past, when Man developed from the ape to the human. In some circles this is discredited. It is a weak hypothesis at best. If we did descend from the ape, as we are all taught wrongly at school, why then is it that the apes in the jungles of the Earth today, are not becoming humans?? Some may argue that this is because they were never intended to become humans due to their genetic code etc. But that still doesn't answer the basic question, does it!

#### WHERE IS THE APE-MAN CONNECTION THEN?

There are two lines of thought on this. If this biological accident did occur in primitive apes, then primitive Man would be created. Then the two species would live side by side for a while, only to go their separate ways later. If this was the case, maybe there was a series of DNA malfunctions. Solar flare-ups causing intense radiation would do this. I'm sure there are laboratories even now 'messing about' with rays on living tissue only to create monsters. That would of course be very much hush-hush. In fact siamese twins of the like you have never seen are even now hidden away from the world. I had a photosome of them. Therefore the sun's rays probably did this before the Earth settled in space. (my guess). Due to this 'freak' of NATURE amongst the primitive apes, Man was created with a THINKING, REASONING brain. Man's reasoning process was thus created. The process would then continue right down the line to present day Man. If one day this biological accident occurs to some other animal on Earth-humans had better watch out. On the other hand, apes and Man could have developed along different lines of metamorphosis. The biological accident which may have occurred would have only occurred to one ape, at first, which passed its genetic mutation down.

to the others, and in turn, after an uphill struggle, Homo-Sapien was the end result. One may ask, well, if the ape got its thinking brain by an accident, what happened to the rest of the body; i.e. the hairy-like form and long arms etc? To that there is no instant answer, but my guess is that over eons of time the Man-Ape creature by the process of metamorphosis-evolution created the body we now find ourselves in. Intelligence of the thinking ape-man's mind would make the situation more ideal for himself, and as he wouldn't need to swing from tree-to-tree, and used weapons to protect itself, then arms would not be needed for that purpose. Take the feet of the average ape. They can grip like a pair of hands. Stuff these into shoes for a few million years, and they may become shortened. Therefore the biological accident in the apes, affected the shape of things to come - and Man was the result.

Still others, who believe in the Holy book, and also studied UFO's have tentatively suggested. Man does not originate from this Earth at all, and that we were put down here, for some purpose, by a super race of people. Adam and Eve could have arrived by space ship. But the food they ate while here had strange chemical properties to their metabolism. They died after a hundred or so years instead of their allotted thousands. (so the legend goes). One writer into Mankind suggested that the name Adam was in fact, a race of people, not one man.

All of which you have been reading in the last few paragraphs could all be possible. 'NATURE' does go wrong, or is it, in some cases, right, or, to be expected. If so, should man tamper with nature and let it run its true course. If man ignored freaks of nature and did not control it, maybe mankind would be the type of civilisation one could only imagine in his wildest dreams. Artifacts, have, been dug up and secretly destroyed or hidden, so I am told by someone in the know about these things, for fear that their knowledge would render the governments useless to their people. As far as I am concerned, there has been life on Earth, in a far advanced state than it is today. The proof, hidden of course, is here. So there

# UFO SCARES GIRL

Story as seen on front cover.

CREDIT: EVENING TELEGRAPH, Tuesday, October 10, 1978

A TEENAGE GIRL HAS RELIVED THE EVENING SHE RAN TERRIFIED AND CRYING THROUGH THE STREET WITH A FRIEND-CONVINCED THEY WERE BEING CHASED BY A UFO.

Caroline Muncey (15) said they were shadowed until she went to a house for help and the "craft" disappeared.

The girls' ordeal began as they were walking home from a disco at Wellingborough on Saturday. It was one of a series of mystery sightings in the area.

Caroline and Mandy Doolley (16), who both live in Vicarage Farm Road, Wellingborough, saw bright lights in the sky.

After a few minutes the lights vanished and the friends continued walking home along Queensway.

Caroline said. "We started talking about something else, then Mandy looked behind and started running. I looked back and saw the lights bathing the road, and ran."

"I tripped and fell. It was right behind me, gliding over the bridge. It was getting so near.

"I knocked on somebody's door and the UFO turned away up into the sky."

Caroline, a pupil at Wellingborough's Breeze-hill School, added: "I was terrified and crying. I came out in a rash, all over my hands and arms."

Caroline explained that the object turned upside-down, with the dome facing towards the ground, and the lights went out.

The man whose door she knocked on, Mr. Les Stainer, told her it looked like an old wartime bomber as it disappeared.

Caroline went home and drew a sketch of what she had seen. (see front cover).

The incident occurred at about 9.30 pm - and an Irc-hester man saw an object in the sky in the same area at 9.15 pm.

Mr. Martin Batley said he was driving along the Finedon to Wellingborough road when he saw it.

"It was delta shaped—like a 'V'. It was enormous and had two huge white search-lights at the front with a green light behind," he said.

He got out of his car and

several motorists behind him did the same.

Mr. Batley added: "One woman was really panicking and I was terrified."

"The object was making a thin whining noise. It was stationary for about five minutes and then zoomed off."

Taxi driver Mr. Victor Angers is also convinced he saw an alien craft on Saturday evening.

He was travelling from Higham Ferrers on the A45 towards Sanders Ledge with a fare, Malcolm Young, when they spotted something in the sky.

Mr. Angers, of Milton Street, Higham, said they pulled into the side of the road opposite Skew Bridge Ski Club to look at the object hovering three or four hundred feet above.

"We wondered why it wasn't making any noise. We thought at first it might have been a jump jet or something but it would have been making a horrendous noise if it had been a normal aircraft," he said.

The UFO then moved off, accelerating towards Higham.

This is the second time in less than two years that a UFO has been seen near the ski club. Staff there reported a sighting in December 1976.

Members of Corby's Kingswood Community Association football team were just finishing a training session on Friday evening when they claim they saw a UFO.

According to the team member

Mr. Jimmy Middleton they saw a line of different coloured flashing lights.

"It was far too big to be an aeroplane," he said.

"The object moved very slowly from Weldon towards Beanfield. It took at least seven minutes to disappear. There were 16 of us who saw it at about 7 pm."

Several sightings were reported the previous weekend—but they turned out to be nothing more sinister than four light aircraft from Sibson airfield, near Oundle.

However a spokesman for the airfield said there was no night flying on Saturday.

He dismissed all talk of UFOs and said sightings were more likely to be shooting stars.

The spokesman said:

"There are a lot of cranks about and many people imagine half of what they see," he said.

Mr. CNK says: I wonder if half the ski club personnel and football club men come into that category, friend!

- Editor.

'CRANKS' ANSWER BACK:

Evening Telegraph, October 21st, 1978.

UFOs—A PERSONAL SIGHTING (Northamptonshire Newspaper): (next page)

"I have just read an article concerning a UFO sighting, which appeared in your paper early this week.

"For the benefit of the spokesman for Sibson airfield may on behalf of my family confirm the sighting--and I might add, we are not cranks.

"As you will see from my address we live on the hill overlooking Rushden. My attention was first drawn to the object when my son came in and said he could see a UFO. My first reaction was to dismiss the claim and say it was just an aircraft because of the white and red lights.

On studying the object, I realised it was far too low and moving too slowly to be an aircraft. Being silent also ruled out the possibility of a helicopter. It was drifting a few hundred feet above the ground.

At this point I decided to look at the object through my binoculars. Although I could not determine what the object was, I could clearly see the formation of lights, these being four white stationary ones and two flashing red ones.

I then thought it possible to be a hot air balloon drifting slowly and silently along over the town.

However, at a certain point it seemed to turn sharply to the

right and gain speed, taking it in the direction of Chelveston air base, at which point it gained height considerably until I finally lost sight of it due to distance and height.

This happened on Saturday, October 7, (1978) at around 9.30pm.

I have an open mind on the incident but it was not a conventional craft and it was certainly sighted by responsible people."

D.B. Saddington, 182 Bedford Road, Rushden.

"I read with interest the story 'Girl re-lives UFO night of Terror'".

My wife and I were taking our dog for end of day exercise down the Irthlingborough bypass at about 9.30pm on Saturday October 7. My wife drew my attention to a flying object. To me it looked like any other flying machine.

It had a light at the front and one at the end of each wing and a green light at the tail.

There was a flashing red light at the centre, but what struck me as being very unusual was that, considering the average height, it was comparatively quiet, so much so that it could have passed without being noticed.

That, in my opinion was the only unusual feature about it." F.W. T. WARD, 64, Addington Road, Irthlingborough.

# ANTI-GRAVITY RESEARCH

How investigators are standing up to the problem today.

By the Editor

**D**EYFYING GRAVITY HAS ALWAYS BEEN MAN'S DREAM, and the reason he has not been able to do so is because gravity is hard to understand despite numerous text books and encyclopedias written about it. Even today gravity is still a mystery, yet, finally something is about to give. Suddenly, there are hundreds of private researchers struggling, with capital investments, to find an answer to the problem. The trouble with fulfilling that wish totally and wholly lies in one thing...MONEY and CAN IT BE COMMERCIALISED? Because its full potential cannot be realised by short-sighted and tight pursed governments, this valuable line of investigation is being ignored! That leaves people like professors in some Institutes which I will leave nameless "using other peoples' ideas for their own credit, and maybe own financial rewards.etc." Having said this, let us now take a look at what is happening today, and throw some light on those poor researchers which could do with your financial help.

Before we begin to look at the inventions which are now being developed, let us drop a few names of those now engaged in its research into what gravity really is, and who are trying to do something about it. THEY are definitely not the type of people who will sit down and watch television or go to the bar every evening, oh no sir, they mean to find that answer, and some of these people are: Professor Eric Laithwaite, Ewdwin Rickman of Colchester, Essex, Myself, Edward Harris,

John Saarl of Berkshire, England, Rolf Schaffranke U.S.A., Professor Shinichi Seiki of Japan, and Thomas Townsend Brown, along with Professor Paul Biefeld. USA. I could mention here briefly also that Leonard G. Cramp also wrote something on it some years ago, but we don't hear much about that now.

## WHAT IS GRAVITY?

Sir Issac Newton really had an insight into it, but he himself did not say what the CAUSE of gravity was. Einstein had a crack at it too, but no development from these two scientists on how to defy it was forthcoming.

Starting with my own researches. I began in 1968 with a visit to the public library and got out everything I thought would

help overcome gravity. NOT ONE BOOK WAS ANY GOOD. So I began thinking in the terms of static electricity and the 'free-flying condenser' which then not known to me but from notes in Cramp's book there was mention of was being tried out.

The first problem was to construct two glass plates of a Whimshurst influence machine and feed the current into the condenser to see if this would find the cause of gravity. Needless to say it did not work, being very primitive.

This year, 1979, I visited the Chelmsford Library and tried once again to fathom out gravity. I came up with these notes: 'How do we overcome this formidable attraction? One writer said in an encyclopedia: "' Gravitation cannot be avoided, unless we can get infinitely far away from all matter. No substance is known that has a negative mass, that is, the property of being repelled by a gravitational field. Even anti-matter (positrons, and anti-protons, etc.) has positive mass. Gravitation cannot be shielded against by interposing a barrier as can electricity. "

Gravity may be a change in velocity. Although when I was at college and wrote a paper on the subject, the physicist who read it said NO to that question (?). But, if you collide with someone while walking, it's like hitting the ground when falling—your motion is checked. A force, due to collision thus produces a change in velocity. Force of impact produces a velocity. Sudden velocity in a speeding car, etc., will push you into your seat—that is termed too, as gravity. (i.e. so many 'g's'). Then there is the other attraction of mass itself. But what is mass? Mass must be a sever collection of atomic particles all clinging together to create matter and being of sufficient density therefore must be mass. All atoms attract electrons, protons etc., and all are binding the whole planet together. NOW given that is true and I can't fail to see how it cannot be, then it must be admitted that the electromagnetic attraction of the electrons, which are a wave form (NOT A PARTICLE), must have an attracting influence on everything else around it. In this manner, you, and I are stuck to the planet, in very much the same way as a charged comb attracts and holds pieces of paper to it. With this analogy, 'we are the bits of paper' the Earth is the comb. Everything that has mass has an attraction, from the smallest particle, therefore, you and I, and indeed this very magazine you are holding is ATTRACTING THE EARTH,

But because the Earth is millions of times bigger, has more mass, which is pure electromagnetic power of the binding forces, it will only attract this magazine if you let it go. IF the Earth IS hollow, and DOES have a central sun inside it, as all data indicates, this could also be a contributing factor to what gravity REALLY is. I know many of you 'learned' scholars out there reading this in your universities etc., will raise a few eyebrows at all these hypotheses, but at least have an open mind to see if the ideas are valid. Just because you are taught today's values which were YESTERDAY'S PAST HISTORY, for goodness sake, don't let CONVENTIONAL education bag you down in the mire. If you were taught that blue was black because 'they said it was' and you go on believing that, you will put gravity research back thousands of years. In other words FORGET NEWTON AND EINSTEIN and take a fresh look at the problem, JUST AS IF EINSTEIN AND NEWTON HAD NOT BEEN BORN, and then see what you come up with!

A few people who have done just this have come up with some startling new technology, which makes Newton etc., as antiquated as a first world war airplane. These people worked out that gravity has a relationship with electricity, just as electricity has a relationship with magnetism. But first, let us examine MECHANICAL METHODS of anti-gravity, because they do exist and they DO work, because I for one along with others have proved it:

BELOW: Your editor with his ball bearing device.

ANTI-GRAVITY from BALL BEARINGS??

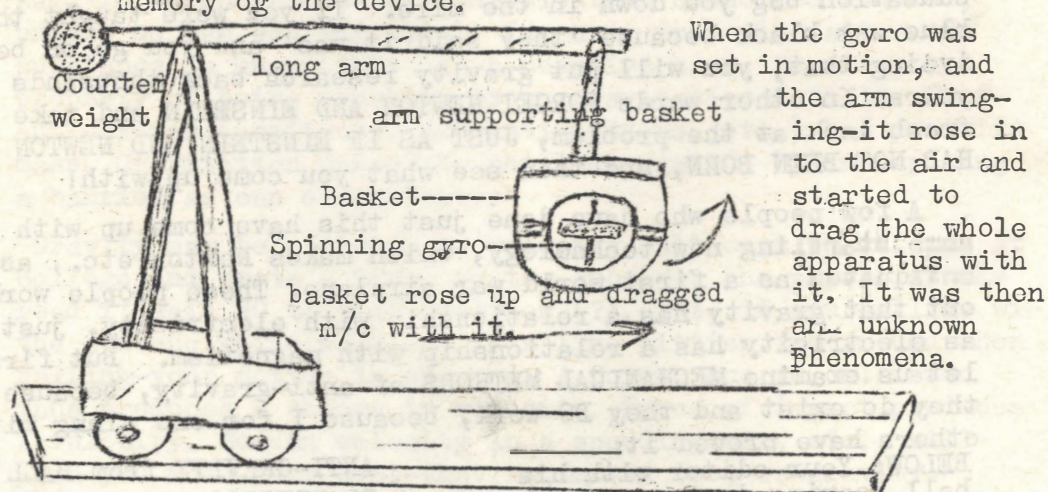

In 1974, I had the idea of using ball bearings which would be thrust upwards and gathered in at the bottom. As the momentum would be greatest at the top, and not any at the bottom, the device should lift itself up. But it did not, because for every action there is an equal one elsewhere. The force of pulling them together at the bottom counteracted any lift at the top. Unknown to me, there was an experimenter in the U.S.

also working on a similar idea and it was known as the DEAN DRIVE. I was told later that it did not work by Professor Laithwaite.

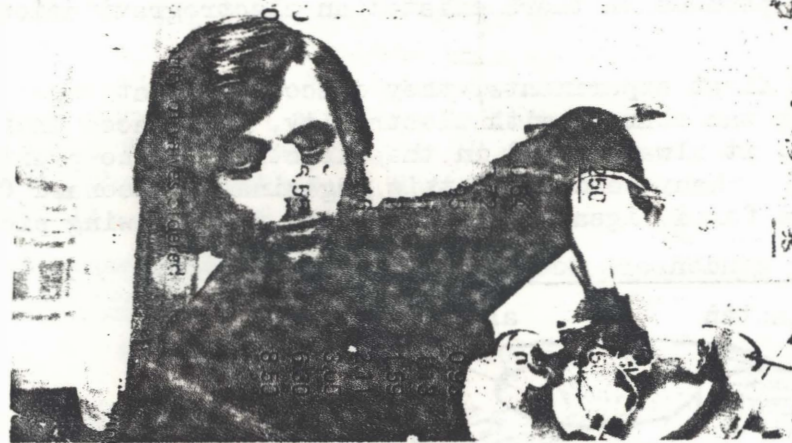

Then on March 4th 1974, I decided it was time to work on gyroscopes. Somehow anti-gravity was 'locked up' in this amazing force. Soon I had tiny model hopping about on my table top. Then on TOMORROW'S WORLD a device was shown which looked like a crane with a basket on the arm. Inside this basket was a spinning gyroscope.

Here is this device roughly sketched from a fading memory of the device.

This unusual item led me to develop two revolving gyros on a disc, which was itself swung or spun around on a VERTICAL plane. But the torque was too great and the gyros stopped spinning. Suddenly lo and behold, there came a press item on Professor Eric Laithwaite and his 'anti-gravity device. Exactly the same as mine only on the HORIZONTAL plane. This time the gyroscopes were mounted on two hinged arms and when spun, they rose upward. They lose all their weight. Professor Laithwaite then mounted a circular strip above them so that when they rose, they would follow the path of the track, which was turned downwards. As each gyro rose it exerted a pressure on the track at the centre as well as the edges. The whole machine lost so much in weight, (See Daily Express 8 November 1974).

On reading this, I got my device out of mothballs and tried it this way up. It worked. However, Professor Laithwaite was using compressed air to drive his gyros. I decided to use electric motors. It worked, much to his surprise when I showed it to him. The idea of the swinging arm gyros as it stood within, was not his idea, but originated from a man in Colchester, Mr. Edwin Rickman, who had no scientific background, and was, it seems, an act of clairvoyance, because he saw the device in a DREAM! The state of gyroscopic research into this must still be going on. It has been a long time since 1974 and I have not heard any further developments of it save a few odd remarks made on Patrick Moor's 'Sky At Night' TV Programme.

Your editor with his weight-losing gyros. Picture credit: Braintree & Witham Times, Sept. 1, 1976.

#### NEW APPROACH TO GRAVITY CONTROL. 1979 RESEARCH

Now we have to leave behind mechanical devices, they have played their part. Maybe we may have to use them WITH other means of Anti-Gravity.

What has Flying Saucers and modern day research in common. Well from the last few pages on UFO sightings we saw that MOST UFOs are, in the main SILENT. That means their form of propulsion is utterly different from anything we know of today, but then, maybe we are on to it.

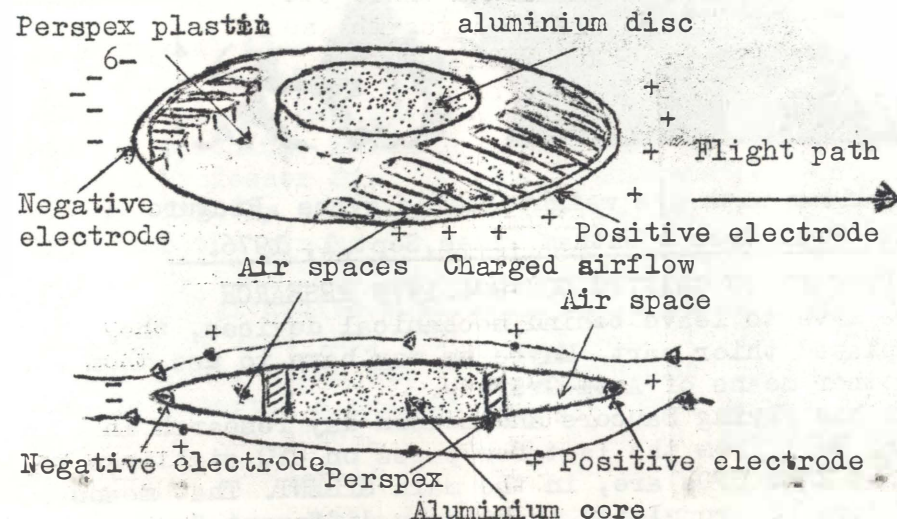

If as much money could be spent on anti-gravity research as was and still is, being spent on the American Space Programme, we just might have seen some results. I say this because there were a few Universities having a crack at it early in this last decade. One such university was Princeton, in the U.S.A. They had produced some sort of hovering saucer. Where is it today, or is it classified or just plain useless?

In their wake, or perhaps long before their research we had two scientists working on the problem. One was Professor Biefeld of Denison University and T. Townsend Brown of the U.S.A.

They wanted to solve, I think, the riddle of UFO propulsion, and came up with the idea of electrical-magnetic propulsion as early as 1923, when Professor Biefeld suggested to Townsend Brown, certain research which led to a phenomenon known as the Biefeld-Brown effect. It was the advancement into a new branch of science called electrogravitation. After 28 years of research by Brown, it appeared that for each electromagnetic phenomenon there existed an electrogravitational analogue.

In their first experiments, they discovered that when a condensor was charged with electricity, and placed in free suspension, it always moved in the direction of the positive electrode. Many readers of this magazine and Leonard Cramp's book: 'Piece for a Jigsaw' will recognise the following picture:

#### The flying condensor Technical data:

Although Townsend Brown has updated his research in the 30 years he has been doing it, not much has come out of it as far as I can see. How can someone work for 30 years on a project and get nowhere with it?

In the German UFO newspaper 'UFO NACHRICHTEN' (UFO NEWS) there appeared an article and a sketch by a Professor Shinichi Seiki of Japan, who in his Gravity - Research Laboratory has been putting the finishing touches to his anti-gravity device.

We here in CNK have been in touch with all of these people in one way or another, and two of them have now produced books entirely devoted to the subject of gravity . . . devices. (i.e. the control of gravity). IF YOU WISH TO BUILD OR GET INVOLVED IN GRAVITY RESEARCH I STRONGLY RECOMMEND YOU SEND OFF FOR THE FOLLOWING BOOKS: (I'm sure that with each book sold, you may be helping towards the understanding of gravity and also supplying the needed funds to which private researchers are always in need of. So ends an article which, if went on and on with intricate technological data would fill up CNK and become an encyclopedia on anti-gravity, because since 1968, when I first poked my nose into it, this subject has been moving forward. It could solve the energy crisis, and make Concorde obsolete overnight. So if you want to convert your car to the principles of stressed dielectric drives (anti-gravity), send for the three books on it now.

Editor. July 1979

NEW KNOWLEDGE IN THE MAKING.

No. 1.

ETHER TECHNOLOGY:

A rational approach to gravity - Control  
by RHO SIGMA

"There isn't any energy crisis. It's simply a crisis of ignorance." so says -R. Buckminster Fuller. A 108 page book of diagrams, inventions, photographs of anti-gravity devices and gravity control. Very well produced. Paperback, stiff cover 15cm x 22cm approx. Professionally published and printed. Letterpressed throughout. Some of the Contents covers: THE AMERICAN SCENE, ELECTRIC WIND IN A HARD VACUUM, EUROPEAN RESEARCH with John Searl's massive saucer (grounded), ETHER VORTEX TURBINE, FRANCE: The Gravitational force Can be Neutralised. And much more: Written by a European space scientist. (see over for details)

Finally comments on the book from Dr. Henry F. Pulitzer, (of Pulitzer Prize family fame), London: "One of the most important documents of our time...definitely the best of its kind." AVAILABLE FROM: Tarnhelm Press, P.O. box 7, Lakemont, Georgia, 30552. U.S.A. \$5.75 pp. or write to: Rolf Schaffranke, 207 57th St. Apt. B, Virginia Beach, VA 23451, U.S.A.

\* Editor's note: If the U.S.A. can send men to the moon in an antiquated moon rocket, then I'm sure this new discovery into anti-gravity by them will be taken seriously enough to ensure that further trips to the moon etc., will soon be made by flying saucer.

## WHO'S WHO <sup>in</sup> UFOLOGY

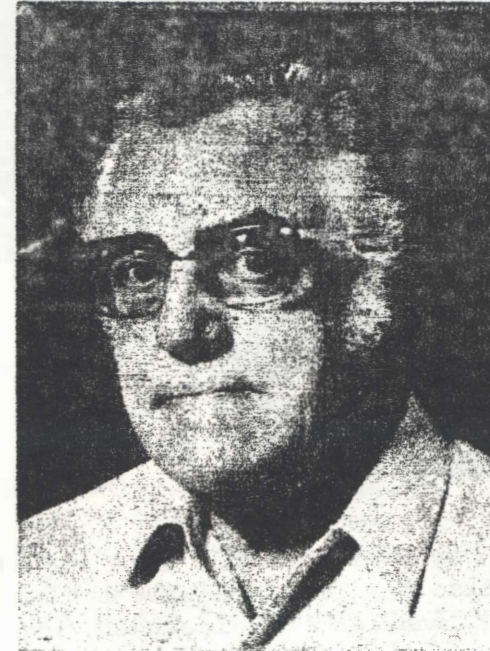

Continuing our photo line up of who is who in the subject of ufology.

Ken Horsnell, gives the thumbs up sign in 1959 at the commencement of the club we formed the I.S.T.R. Ken was only 17 when this was taken.

Searching through my 'archives' of old stencils, I came across this fellow. KENNETH HORSNELL (left). If it was not for him way back in 1956-7 then in all probability this magazine would never have existed. It was Ken's keen interest in Rockets and sometimes in UFO's, which lead me to produce a long line of magazines on the subjects, leading to CNK itself. Needless to say, he is no longer connected with any of this, but old readers will remember the nostalgia of seeing his photo once again. David Prockter once said: "He looks like he is about to strangle himself." If Ken had known what we know now, he might have done-eh? Ken? I hope you will read this one day wherever you now are. !Edward Harris.

# KARL L. VEIT SIEBZIG JAHRE

Der siebzigste Geburtstag wäre die große Gelegenheit, eine umfassende LAUDATIO zu schreiben über Karl Veit und sein Lebenswerk, zumal sie in jeder Beziehung gerechtfertigt wäre.

Doch das ist durchaus nicht im Sinne eines Mannes, dessen hervorstechendste Eigenschaften Bescheidenheit, Pflichtbewußtsein im Dienst an der Sache und ein unverwundlicher Idealismus sind. Er hascht nicht nach „Publicity“ und will nicht gefeiert werden. Wer ihn kennt, wird seinen Wunsch respektieren. -

Was also bleibt dem Chronisten? Immerhin noch reichlich genug Stoff für eine sachlich-nüchterne Betrachtung dieses von Arbeit, Geduld und Zähigkeit geprägten Lebens. Ein gleichermaßen mit Mühen und Sorgen, aber auch mit Freuden und Erfolgen angerei-

Left:Karl L. Veit, Director of DUIST at a recent convention in Germany, 1975. Also far right Elisabeth Klarer, writer of "BEYOND THE LIGHT BARRIER" in Wiesbaden. Man in centre un-named.

That excerpt in German was from Karl's UFO NEWS newspaper, which he has been producing for many years. Karl's group seems to be very specialised and he has members of his organisation situated in many parts of the world. Every so often these people are invited to attend conferences on the UFO subject in Wiesbaden, the group's headquarters. It was recently seen in his UFO NEWS the article on gravitation seen in this issue. His mainstay in this is through his UFO NEWS, and it deals with landings and every other type of UFO phenomena. Karl's piece about himself has been mislaid, but from memory, he is 70 years old and has been doing this research into the paranormal for years. This year, Karl is holding another UFO convention and CNK was invited. Distance and cost prevents us from going. However we wish him the best of luck, and many more years in UFOology.

JOHN BRENT MUSGRAVE, Alberta, Canada. John has this to say about himself:

"I don't really have the time to think up something to write about myself. The inclosed promo by Timothy may interest you though." Here's the enclosure:

BORN WITH AN INQUISITIVE mind, John Brent Musgrave has been interested in UFO's and especially in reports of humanoids and "critters", for many years. He wanted to know what was behind the behaviour of these strange beasties, since he always felt that the answer to the UFO mystery was probably not found by investigating reports of lights in the sky, but in the all too numerous cases where creatures have actually been seen to emerge from these unknown craft. Make no mistake about it. John Brent Musgrave is no flying saucer "book". Instead, he is a highly trained astronomer who knows the difference between conventional objects that are often mistaken for them. What he has discovered during his research is absolutely amazing. He has weeded out those cases which can be rationally explained and has come up with some utterly thrilling findings. He has applied for a grant and received a sizeable one from the Canadian government to do research into those reports, and for several years John gathered all the material he could find.

\*CNK says: This is of course promotional literature for a book on outerspace creatures John has produced. If you want to write about it; to: J.B.Musgrave, 10228 115th St., Edmonton, Alberta, T5K 1T8, CANADA.

LEFT TO RIGHT: Mike Parry (ISTRGA UK) N. Cockburn, Roy Lake at a Symposium held by Lionel Beer of BUFORA in 1970. (who's who continues on page 28)

### THE PHILADELPHIA ----- EXPERIMENT

#### PROJECT INVISIBILITY

Is it within the bounds of possibility that a scientific experiment could render a ship invisible, cause it to re-appear hundreds of miles away and bring it back again, all within the space of a few minutes?

This is the extraordinary story told by Charles Berlitz in his new book of the same name. It is the story of a U.S. Navy destroyer that was rendered invisible to foil the enemy in an experiment, the ultimate camouflage using Einstein's Unified Field Theory. Whether it was meant to do the unexpected is still today's mystery. FROM: SOUVENIR PRESS 43, Great Russell Street, London, WCL. Price: £4.95. (16 pages of photos)

## What's What? IN UFOLOGY!

L'espace réservé aux passagers est entièrement recouvert et la cabine étanche est climatisée. Le "Zisch" a en effet été conçu non pour chevaucher les fortes vagues, mais pour les transpercer, gardant une trajectoire rectiligne. Il est propulsé par une hélice. Sa longueur de 6 à 7 mètres le rend maniable et son prix attendu, environ 15 000 DM, accessible aux bourses moyennes.

Does any reader recognise these two items. And are they somehow connected? CNK has had these items hanging around for years. We know they came from some French magazine, but what is the picture showing? It appears to be some man-made craft emerging onto the surface of a storm tossed sea. Or what do you think it is? If you know, don't keep it to yourself, let's hear from you. The French item may or may not be related. As your editor had hardly any knowledge of french it will be just as it is, unless you can read it. Was some scientific undersea vessel being tested or was it one of those underwater UFO's we keep hearing so much about!?

WHO'S WHO continued.

**L O R E N Z O M A S S A I**

Lorenzo Massai is editor or helper of an Italian magazine called: 'NUOVE REALTA' which means 'Reality News'.

He was born in Prato, Italy, a city near Florence, on March 18th 1957. He says he began to study Ufology in 1971. His interest began when he purchased an Italian Review called: 'Il Giornale dei Misteri' that dealt with those things. He once belonged to a now dissolved group the G.R.U.S.M. now ceased. He says: "At present I collaborate with the C.U.N. (Centro Ufologico Nazionale)

**L O R E N Z O M A S S A I**  
22 years old  
Prato, Italy.

My activity is that of a geometer. "

**BOB BLOOMFIELD** late  
BOB Blomville.

Bob Bloomfield, after seemingly to change his name, now produces a foolscap size sheet of paper photocopied with some good reports of UFO's which he calls 'UFO REVIEW'.

Bob first Joined the I.S.T. R. G. UK under Mike Parry, but soon left for reasons known to himself. He contacted CNK and has sent us small tit-bits ever since.

Bob also does voluntary work for political parties, of which he stands firmly behind the union Jack. Bob, I believe, is now getting organised in other fields of interest, like selling. I hope he finds what he is looking for in life one day. All best wishes to you Bob, and thanks for getting involved open mindedly in ufology and all us ufologists.

**CAROL HALFORD WATKINS (Canada)**

Carol has been around in this subject as long as CNK and us (oldies' for a long time. She got interested in the subject and brought out a metaphysical magazine called: TOPSIDE, of which those of us who still remember it have fond memories of.

Carol, after a slight upheaval in her life, decided to cease TOPSIDE in 1970. When she visited England some years ago she gave a message to all of us on 8mm film of which I have yet to have copies made. So Carol you will still be getting one before year 2000 OK?

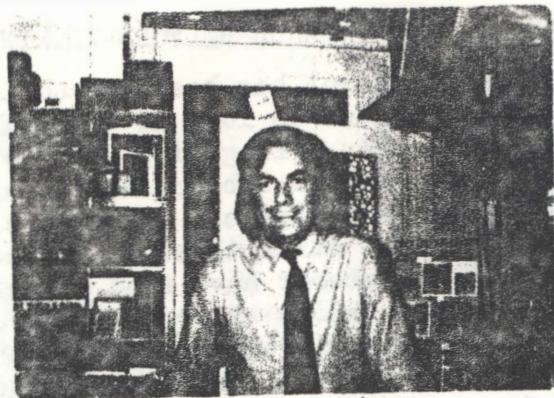

Carol has recently visited many places, one being Hong Kong, She is seen here with Father Manuelo, an English speaking Portuguese Priest, who acted as her guide on a tour part of mainland China, in 1978.

Dr. Frank E. Stranges, director of his own group NICUFO of the USA, came to Woburn Abbey (seen here) to the ISTR UFO convention some years ago, bringing with him some good documented 16mm film of UFOs in flight and one of a landing.

Ufology is usually an unrewarding job, but Frank seems to have found a way around that! We wish him well.

Finally in our gallery of 'stars' we present the conclusion of our WHO's WHO by saying WHO SEES UFOs? The gentleman seen above, one time reader of CNK, Michael Perry of Dunmow, Essex, who in 1974 ended up as full page news in this magazine when he sighted something odd in the sky above Dunmow.

Michael who works for David Lipson's camera shop in High Street, Dunmow, was not ready with a camera on the day he saw his very first aerial object. At the time he said:

"I was out in my garden with my father, when suddenly we noticed, in the southern sky this very bright object." It was Michael's father, Mr. Derek Perry, who saw it first, and went indoors to get his binoculars. The time was 7.30 pm on the 16 August 1974. Michael was not fortunate to have the binoculars for the sighting and had to put up with a running commentary from his father.

Next time we hope that if Michael on his tours around these areas with his camera equipment at the ready, may be able to provide us with photographic evidence. So keep that camera ready Michael and now and again, take your eyes off the bride, and look upwards. OK? Thanks! That's how ATV camera crew got theirs a few years' ago. CNK and its Editor wishes all at the shop good luck and you can still get copies of CNK in your local newsagents, namely Willetts. Thank you for your past support.

It goes to show, that whoever you are, in whatever walk of life you may find yourself in, there's always the chance that if you are a skeptic, you, one day, may well not be. So keep looking up, your future may lie in that direction.

## LETTERS to the EDITOR

Some recent letters:

24th July, 1979

Dear Mr. Harris,

I was most interested to hear that you have evidence of a similar experiment in England (Philadelphia Experiment), and have passed this information on to Charles Berlitz, together with your address. I am sure that he will be in touch with you in the near future. He tells me that since the book was published in the UNITED STATES, many people have come forward to corroborate the story and to supply evidence he did not have. He is hoping to incorporate this material in the next edition of the book.

Many thanks for writing about the above, and let me say how sorry I am to hear that your magazine will cease publication in December. As you know, the papernormal in all its aspects is something of a speciality for Souvenir Press, and it is sad to see another magazine closing down which is prepared to treat the subject on a serious level. I do hope that your disappearance will prove to be temporary. Yours sincerely, Tessa Harrow, Publicity Manager, SOUVENIR PRESS Ltd.

Dear 'Sir' Edward, 6 June 1979

This knighthood is for work beyond the call of duty in your service to the UFO cause as editor of CNK.

At the moment I'm in the North of Scotland where we have a small cottage looking north towards the northern lights and the inner Earth. Haven't seen any UFO's but there is a PUMA in the area. Herewith a subscription of £2.00 to allow you to live in a style to which you've now been promoted. With Best Wishes, Alan Hilton Smith, Hilton & Cine Photographic, (Hilton Aviation Ltd) 7 West Hill, Dartford Kent.

\*THERE! I hope the publishing of your address will have lots of people rushing in for their passport photos for Mars, when you take them there in your biplane. Cheers! It's the LEAST I can do for the Knighthood, ha!ha! Yet another: Dear Mr. Edward Harris, I say this as a joke, but I sometimes feel you must sleep with your typewriter in the bed! Otherwise you would never be able to push out the volume of material that you do! When are you coming for that plane ride? Maybe we could see what happened to flight 19?! I'm sure they would let you write from TAU

CETI. Best Wishes, A. Hilton Smith, Dartford, Kent.

\*Nope! the Puma may get me! Typewriter in my bed! NOT quite-just beside it!  
Dear Edward. March 20th 1970

(after I had made contact for many years):

Many thanks for your letter. Yes I certainly remember you and I am pleased to learn that you are still making valuable contributions to UFO research. There have been great advances in the UFO field with the subject not only having been debated in the House of Lords, but also at the United Nations. Coupled with this has been the huge increase in reported UFO sightings - worldwide.

In order to finance the British UFO Society, we are now selling UFO T-shirts, badges, photos and books. We also run a UFO hotline service for people to phone-in for the latest information or to report sightings.

We have also acquired some property in Warminster and plan to open a UFO Study Centre and provide accommodation for visitors and skywatchers.

Please keep me on your mailing list as I know we shall look forward to receiving your literature.

Yours sincerely, Ken Rogers. British UFO Society.

\*How about selling some CNK's Ken? That would help both of us. As a footnote to Ken's letter, this item appeared in the Southampton Echo on 10 March 1978.

"On the eve of the opening of the film 'Close Encounters of the Third Kind' in London, comes a warning from the British UFO Society. Genuine close encounters with UFOs must be avoided at all costs, warns Mr. Ken Rogers, Chairman of the society and formerly from Warminster.

"There are many well documented cases where close encounters with UFOs have caused the witness to suffer temporary paralysis, blindness, burns and mental stress." he says.

"Enthusiasts should be very careful before sky watching on the hills around Hampshire and Wiltshire."

A LETTER FROM AN OLD 'LOST' EX-CLUB MEMBER:

Dear Ted and Rita, Thank you for sending me some copies of your CNK mag. via my parents. How are you both? It must have been about 11 or 12 years since I last saw you.

I'm now 27, Married, a teacher, and will be moving to

Sussex, to do some further study at Sussex University.

I want to say that I have no further interest in UFOs, my interests are now in totally different fields, mainly English literature, which I feel is far more important than visitors from space. I suppose that surprises you, and if you like I'll explain in another letter. I'm afraid this has to be a short letter, write back and tell me how you both are, please.

Yours Nigel Grant

\*Reply, Excuse me publishing your letter Nigelm but CNK, although International, is also still connected to some members of our old club the I.S.T.R (1968), and they would like to hear from you I'm sure. Thanks for writing, I'm sending you this copy, and I can bet my boots that as a budding English teacher in LITERATURE, you would have pulled this to pieces already. We have an excuse for mistakes now. It goes like this (we borrowed it from the ATLANTIC JOURNAL): "IF YOU FIND MISTAKES IN THIS JOURNAL, PLEASE CONSIDER THAT THEY ARE THERE FOR A PURPOSE. WE HAVE SOMETHING HERE FOR EVERYONE, AND SOME PEOPLE ARE ALWAYS LOOKING FOR MISTAKES!"

Dear Mr. Harris,

30.6.79

I note that your group produces a magazine, and I thought I would write to you in the hope that you would be agreeable to a magazine exchange with us. Our magazine 'Quest' is a bi-monthly and goes to some 40 or so groups (23 in U.K).

In future issues I hope to review the various international publications and would like to include your own. We try to contact as many groups as possible, so that we and they can keep in constant contact and so keep each other updated on what is happening and if there is a way we can help you information wise. Let us know and we will see what can be done.

If you let me know, I will see you get the next issue, (July).

I look forward to your reply in the not too distant future.

Yours faithfully, Terry Hooper, UFO INTERNATIONAL.

\*OUR REPLY: CNK is full of surprises. If people write to us, and your letter hasn't got lost, they get an instant reply, if we are not rushed. But sometimes letters are misplaced for YEARS. I've to answer one only now found dated 1972, so I hope they are still there. Thanks for writing, yes go ahead we look forward to hearing from you. Incidentally CNK is an independent magazine, it has no connection with any group, anywhere-YET! Any offers! (could do with some backing-eh)?

# UFO sightings AND OTHER MISCELLANEOUS DATA

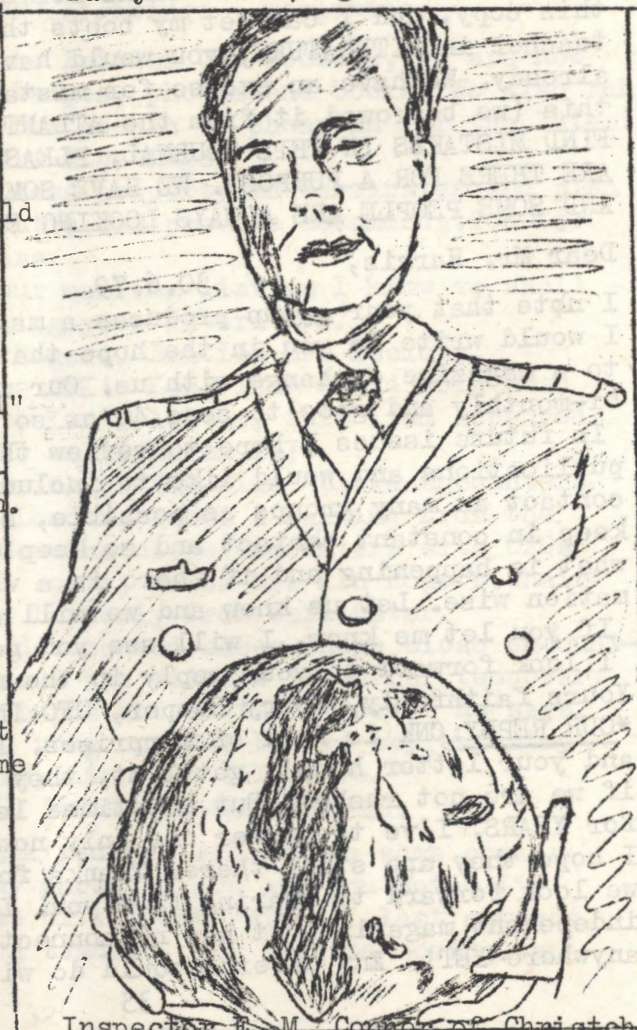

JANUARY 20th 1979

On Saturday 20th January, on the way home to Thaxted, me and my mum Janet, saw a light and when we looked back it was gone.

The light was nearly as bright as the sun. I think I saw a curvey shape as well and there was a spike on the top of the light. My sketch:

Tracey Roberts, aged 11 years.

Inspector H. M. Connor of Christchurch police holding the 'space ball'.

## NEW BALL 'FROM SPACE'

EXAMINED. via  
Bob Blomville/Bloomfield  
Press clip unknown.  
March 1979

AN INVESTIGATION HAS  
BEGUN to trace the  
origin of another  
mysterious "space ball"  
found on a farm at  
Eiffelton, 20 kilomet-  
res south of Ashburton.

The 16.25cm (6½in)  
diameter object re-  
sembles four space  
balls found in mid-  
Canterbury in April  
1972.

Experts believed that  
the four balls had come  
from a disintegrating  
Russian spacecraft,  
Cosmos 428, but this  
was denied by Soviet  
authorities.

The latest ball has  
nine holes burnt in  
it and has obviously

been subjected to intense heat. It is believed to be of  
Titanium, or a similar alloy.

The ball was found in a paddock on the property of Mr. J.  
Lovett, who is convinced it came from a spacecraft.  
Mr. Lovett said he had been in the paddock a couple of days  
previously and there had been no sign of the ball.

"The grass is pretty short. I would have seen it if it was  
there," he said.

The ball was handed to Ashburn Police, who passed it on  
to the National Radiation Laboratory in Christchurch.

As in the case of the four other "space balls" tests had  
revealed no traces of radiation, a spokesman for the labor-  
atory said.

The department of Scientific and Industrial Research and  
similar organisations would be helping in the investigation,  
a police spokesman said.

A spokesman for the Mt. John Observatory said yesterday  
that no satellites had been scheduled to break up, or had  
been seen breaking up, this week.

MALAYSIA a letter and a newsclip, from Dr. C.H. Yeang.

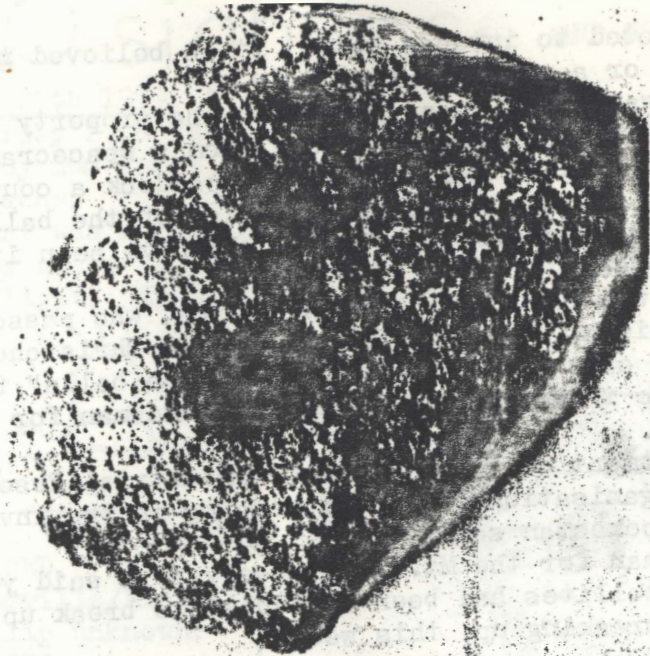

Dear LIGHT BEARER for the new age, (24.5. 1979)

I duly received your airmail copy of No.23 CNK on the 18th  
I am much obliged to you for everything, and shall make  
full use of the 30 copies in the hope that you will get  
more readers. As I said before, adverts, are important and  
the more readers you have the more adverts. you will get;  
it all depends on the standard of your articles!

I enclose some local cuttings regarding tiny UFOs seen  
by boys recently; nobody knows the solution; but I think  
they are gnomes which can imitate anything. You have a  
published book on the subject. I shall send you more cut-  
tings of UFO sightings as they are reported, if you so  
desire. Peace be with you! Yeang.

\*Mr. Yeang's press cutting is on the next page with photo.  
Thank you Dr. Yeang for the book "MY TRUTH" which was re-  
ceived safely sometime ago. It is now being read by another  
person at the moment who studied the ancient Essenes in  
Jesus's time. I sure will welcome any further help from  
Malaysia and Singapore on UFO sightings or ANYTHING out of  
the ordinary. Thank you for writing. I'll write again soon.  
-Editor.

The brick that was "shot by the aliens". Note the burnt marks.

Newspaper and date from Malaysia, unknown. This sighting is however, fairly recent this year.

These little people are getting around. We had a case similar in this country not so long ago this year, when a woman was visited by tiny beings right inside her home.

Has anyone else seen small beings from UFOs? Let CNK know if you have, before December. We cannot promise inclusion if we cease before that time.

## Police to probe 'alien landing'

BUKIT MERTAJAM, Sun. — Police will investigate the reported "landing" of a tiny flying saucer with three-inch-tall aliens at the Jit Sin Primary School compound here yesterday.

A Standard Three pupil, Khor Boon Chew, was reportedly "shot" in the right palm when he tried to grab one of the aliens. The alien also shot at a brick.

Khor said he felt a "burning pain". Five

other classmates and 21-year-old Raymond Liang who were at the school compound, at the time, also supports Khor's story.

They said the aliens, which numbered about four, took off in their flying saucer soon after.

OCPD Asst. Supt. Abdul Aziz bin Nawi said the boy's story was "quite sensational".

But police had not received any report so far. "We will however look into it," he said.

Meanwhile, a senior English teacher here, Mr. R. Veerasamy, said the story could be "possibly true."

He pointed out that about eight years ago, a similar sighting of aliens—measuring also about three inches tall—was reported near the Stowell School here.

**NEWSFLASH!**  
**THIS IS**  
**THE LAST**  
**ISSUE OF**  
**CNK. IT**  
**WILL NEVER**  
**APPEAR**  
**AGAIN.**

but..... something's blowing in the wind... something **REALLY FANTASTIC!**

We can't say what, or when—It's a surprise (Got my fingers Crossed!)

"It was then widely reported in local newspapers," Mr. Veerasamy reported.

"For all we know, there may be some truth in this latest report," Mr. Veerasamy said.

Mr. Veerasamy also pointed out that five Standard Three pupils and an adult had attested to Khor's story.

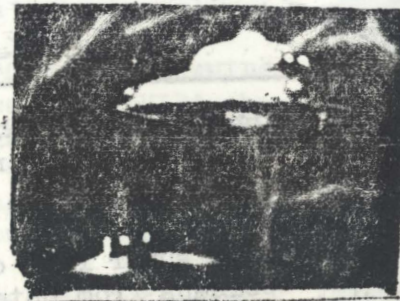

"I don't see why they should all be lying or making up the story," he said.

On the question of fantasy or imagination, Mr. Veerasamy asked: "Can the mind of six children and an adult run wild at the same time?"

"I don't know about others but I believe there is some truth in the story and it merits further investigation," he said.

\* CNK says: This sure is an interesting case. I hope they come back and we can get more evidence of them.

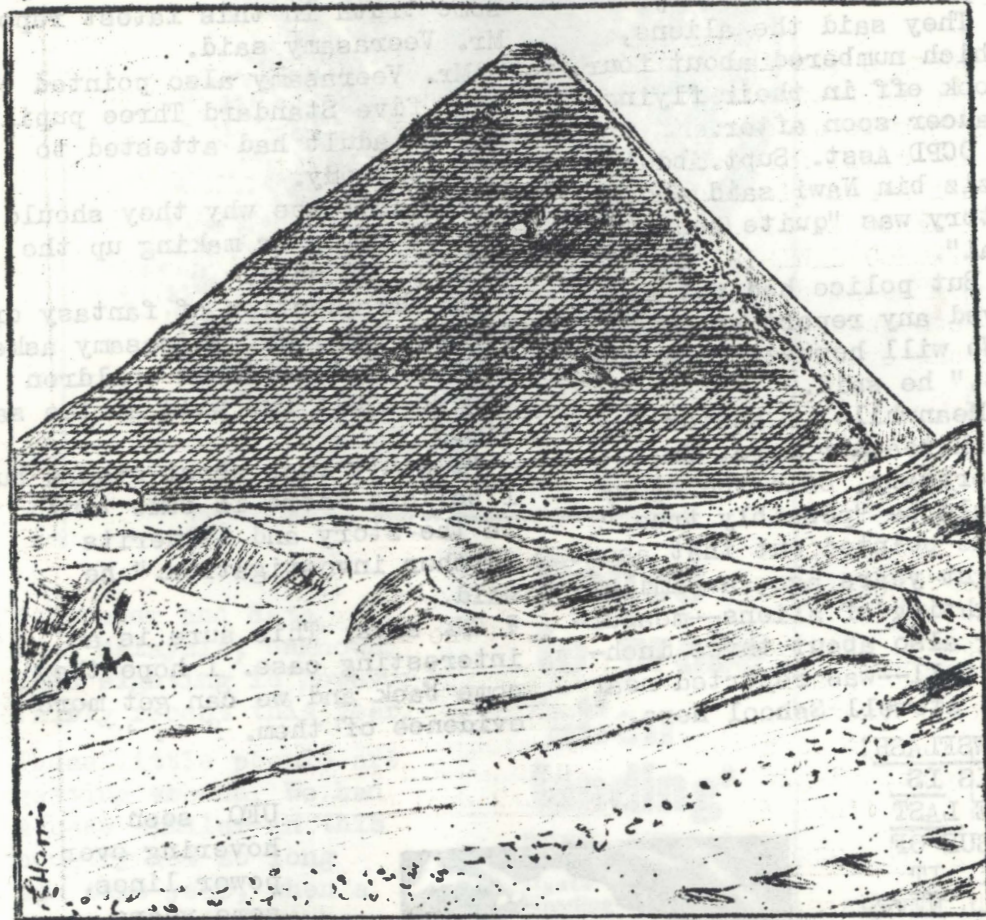

UFO seen hovering over power lines. some years ago.

This is the end of CNK as a NEWS magazine. Thanks to all readers everywhere. All subscriptions will be honoured in the

# WHAT IS THE MYSTERY FORCE FOUND IN THE PYRAMIDS

The Great Pyramid... a technological feat  
Beyond comparison in the modern world

Credit The Sunday Express January 7, 1979.

## INTRODUCTION BY THE EDITOR

SOME WRITERS believed that the pyramids around the world could not have been built by human slave labour, but by

some super race of people perhaps from outer space, with an advanced technology. But in a recent programme on BBC television

it was shown that rocks, from which the pyramids were made, were easily split once the initial cut in them was made. The rock split so evenly and smooth that it appeared to have been made by super technology. However it is still a mystery where the rocks came from or how they got them there. Did the ancient Egyptians float them down the river Nile on wooden rafts, or what? In fact, there are pyramids in other places around the world also. All seem to conform to the same basic design with a slit pointing to the pole star. So who is copying who, and how was the knowledge passed from one country to the next except by primitive ships. But then remember as far as Europe was concerned, the world was flat in those far off times. Maybe other races knew better, and DID cross the seas to establish colonies elsewhere?

## WHAT PURPOSE THE PYRAMID?

The name itself 'PYRAMID' when split up means 'Fire in the middle'. Is this reference to the strange forces that are to be found associated with them?

Leaving aside the method of construction, we now follow the item seen in the Sunday Express:

THE ROLE OF THE GREAT PYRAMID as a tomb has never totally satisfied most investigators and chroniclers. It has often been stated that this man made mountain must have served another purpose, than that of a mausoleum of an ancient ruler. The various chambers within the pyramid have since been discovered and explored, but nothing of any significance was ever found in them--not even the mummy for which the pyramid was built. The secret of the pyramid itself is the knowledge.

The pyramids have been visited by many scientists in the past, and a number of these men have noted unusual phenomena associated with the Great Pyramid of Gizeh. Not long after the turn of the century, the British inventor Alexander Siemens travelled to Egypt to see the pyramid and accompanied by an Arab guide, climbed to the top.

On their reaching the summit, the guide called his attention to the curious fact that whenever he raised his hands with his fingers outstretched, he would hear a ringing sound in his ears. Siemens followed the Arab's example, but instead of hearing anything, he felt a distinct prickling sensation.

Guessing there was something electromagnetic about what was happening he quickly took a newspaper he had brought with

him, moistened it with the contents of a wine bottle, and then wrapped the paper around the empty bottle. In this manner he had quickly manufactured a Leyden jar—a device which accumulates electrical energy.

After holding the apparatus over his head, he realised that it became increasingly charged, to the point that sparks began to fly out of it. The Arab guide, who knew nothing about electricity, accused his companion of witchcraft and attempted to seize Siemens by the arm.

At that instant, Siemens lowered his spark-shooting bottle towards the man, giving the Arab such a shock that he was thrown to the stones upon which the two stood.

On recovering, the terrified guide scrambled down the treacherous building blocks of the pyramid with scarcely a backward glance.

Siemens concluded that for some reason the pyramid was discharging a powerful flow of electromagnetic current...the "why" of which he could not answer.

A more recent experiment conducted at the Great Pyramid's sister structure, the neighbouring Pyramid of Chepren, brought the

enigma of the energy flow to worldwide attention. In 1968 a group of scientists from the Ein Shams University near Cairo conducted a million-dollar experiment to measure the cosmic rays passing through the pyramid.

The goal was to determine whether any undiscovered chambers still existed in the pyramid; for as the cosmic rays strike the pyramid uniformly from all directions, they should, if the pyramid was solid, be recorded uniformly by the detection equipment. If there were any vaults, however, the detection equipment would then show a different strength for those areas.

For twenty-four hours a day for more than a year, magnetic tapes faithfully recorded the cosmic rays received by the detectors. Finally, at the end of the experiment, the tapes were taken to the Ein Shams University to be analysed by the IBM 1130 computer.

The result was absolute chaos. Where there should have been a relatively uniform reading among all tapes, the computer printouts that plotted the cosmic-ray patterns revealed that the readings were different

from day to day.

Dr. Amr Gohed, director of the experiment, was quoted as saying: "This is scientifically impossible. There is a mystery here which is beyond explanation...Call it what you will, occultism, the curse of the Pharaoh, sorcery or magic--there is some force that defies the laws of science at work in the pyramid."

PERHAPS the most significant experiments concerning "pyramid power" were carried out several years ago by a Frenchman named M. Bovis, who ventured into the centre most of the Great Pyramid's chambers, called the King's Chamber.

Ferretting among the accumulated garbage and debris he discovered the body of a dead cat. What surprised Bovis was that, despite the humidity of the chamber air, the cat's body had not decayed, but instead had mummified. It was completely dehydrated. A credible explanation for this strange occurrence was not readily available and Bovis was still perplexed about it when he arrived home in France.

There he constructed a scale model of the Great Pyramid, with a base approx-

imately one yard square. Recalling that the Great Pyramid is one of the most accurately oriented buildings known to engineering--its base is squared only five seconds, or 1/720 of a degree, off from magnetic north--he likewise aligned his pyramid model with the North Pole and concluded his experiment by placing several dead animals about one-third of the way up inside the pyramid.

Without exception, the bodies of the animals did not putrefy but slowly dried out. Whatever organic matter was placed in the pyramid, the same phenomenon occurred. It was found later that razor blades if placed inside became sharpened after 14 days.

In the U.S.A, Canada, and other parts of the world, pyramids are being used by occultists. They are known as "Feedback-Mystic Pyramids." They say that, if a statement or wish is written on a piece of paper, inserted inside one properly aligned, and then pray to the forces within the pyramid to grant the request, in some manner those who have dealt with it say that "something" is indeed answering their prayers to a degree above and beyond mere chance.

# Russia's secret weapon

Credit: Newspaper not known. Source: Bob Bloomfield, London. 2nd March 1979.

## Foreword by the Editor:

I am publishing this item because if you consider the number of UFO sighting of 'cigar-shaped' objects seen, then some of those UFO's seen at very high altitudes could very well be Russian airships.

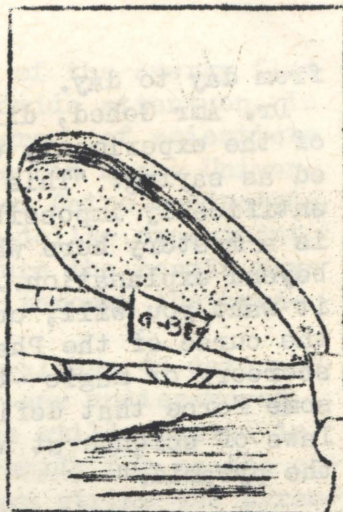

BEHIND A MASSIVE SECURITY SCREEN RUSSIA IS ASSEMBLING THE WORLD'S BIGGEST-EVER AIRSHIP FLEET...AND SOON IT COULD BE FLOATING OVER RED SQUARE... By Bruce Sandham.

THE crew of the Danish frigate couldn't believe their eyes. Right ahead were three of the giant trawlers Russia uses for scooping fish from the sea bed.

And hovering overhead were three massive Soviet airships, transferring supplies and taking aboard catches of fish from the trawlers. What the frigate saw was just another sign of the increasing might of Soviet air power—reaching back into the past to build what is expected to be the mightiest fleet of airships the world has ever seen.

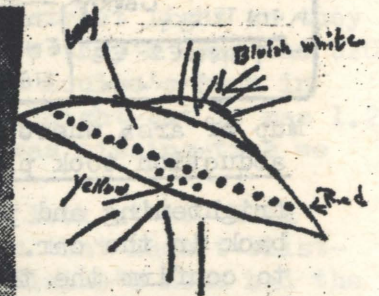

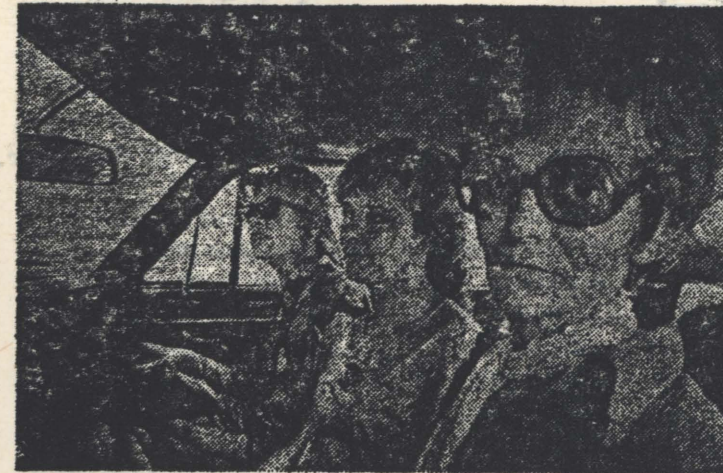

Already more than 50 airships are working with the Russian Navy and merchant fleets and dozens more are in the course of construction at a vast works outside Moscow.

The Soviets were convinced that the airship had a future—and for over a decade have been developing them, behind a massive security screen.

# 3 Women Abducted by UFO

DRAWING of UFO by Louise Smith was almost identical to those done by the other two women, though all were in different rooms at the time.

ORDEAL: Friends (from left) Elaine Thomas, Mona Stafford and Louise Smith were driving along when UFO swooped on them. Then came an 80-minute blank unexplained until the three underwent hypnosis.

...LIE DETECTOR AND HYPNOSIS CONFIRM THEIR CHILLING ACCOUNT  
By Bob Pratt

In one of the strangest, most terrifying UFO encounters of all time, three Kentucky women were taken out of their car and subjected to torturous physical examinations by mysterious beings.

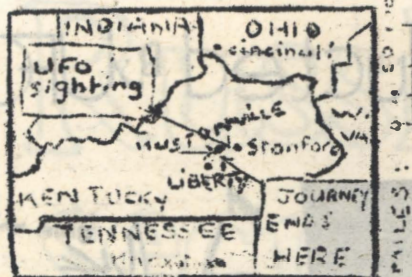

Their incredible ordeal has been verified by police lie detector tests and separate hypnotic sessions conducted by a top university professor.

The women—all lifelong churchgoers with excellent reputations—remember seeing a huge flying saucerswoop down towards them as they were driving along a country road. Suddenly they felt an awesome force take control of their car—until it was hurtling along at 85 miles an hour.

Then came a strange 80-minute blank in their lives—a baffling gap that the women found impossible to explain.

The gap ended with their next conscious memory..Driving into

Map of area where the abduction took place.

a town eight miles away from the original sighting.

It took deep hypnosis to unlock the secrets of those missing 80 minutes. The explanation that emerged was a fascinating story of abduction.

In a trance, each woman told of being removed from the car and held prisoner in a strange chamber. Each also was forced to undergo a

frightening and painful examination before finding herself back in the car. And investigators who probed the case to confirm the trio's experience - each woman suffered a bizarre three-inch (7.5cm) burn on her neck.

"This is one of the most convincing cases on record," declared UFO expert Len Stringfield, a director of the Mutual UFO Network and an investigator for the prestigious Center for UFO Studies (U.S.A.)

Dr. R. Leo Sprinkle, a veteran hypnotist who conducted the hypnosis sessions, said he firmly believes the women described "real" experiences while hypnotized.

"It is very difficult for people to lie under hypnosis," noted Dr. Sprinkle, associate professor of psychology at the University of Wyoming.

"And when three people in separate hypnotic sessions all agree on the essential parts in their account, the chance they have lied is beyond all reasonable possibility."

The three women - Elaine Thomas, 48; Louise Smith, 44; and Mona Stafford, 35 - have lived in and near Liberty, Kentucky most of their lives. Two are grandmothers and the third, Mona Stafford, is the mother of a 17-year-old.

They were returning from a late supper in Stanford, 29 miles from home, when their nightmare began at 11:30 p.m. last January 6. (1975). Suddenly, a mile west of the city, a large disc-shaped object hurtled into view.

"It was as big as a football field!" recalled Louise, who was driving. "It was metallic gray with a glowing white dome, a row of red lights around the middle and three or four red and yellow lights underneath." The UFO stopped ahead of them - then circled around behind their car. Suddenly the auto picked up speed. Louise found she couldn't control it.

"The speedometer registered 85 miles per hour! The others screamed to slow down-but I held my foot in the air to show them it wasn't even on the gas pedal!" Louise said.

Then some awesome force began dragging the car backward.... and at that point came the 80-minute gap in the trio's memories. Their next conscious memory was of seeing a street light as they entered Hustonville - eight miles from where they'd seen the UFO.

The frightened women immediately drove to Louise's home in Liberty. They should have arrived around midnight-but it was 1.25 am. "An hour and 20 minutes, maybe longer, was missing-time we couldn't account for," Louise said.

Louise's neck hurt, so she asked Mona to look at it. Mona found a strange red mark "like a fresh burn that hadn't blistered, three inches long and an inch wide. Elaine's neck had the same mark and so did mine."

They summoned a next-door neighbor, Lowell Lee, and told him their story. He sent them into separate rooms to draw a sketch of the UFO. The drawings were almost identical. The red marks vanished two days later. But the hour and twenty minutes they'd lost continued to puzzle them...until the ENQUIRER had them hypnotized on two separate occasions in July.

During this, all three vividly recalled what had happened to them from the time their car was pulled backward until they reached Hustonville. Elaine Thomas remembered lying on her back in a long, narrow incubator-like chamber while beings - "dark figures, small, looked about four feet high (over 1m) - kept passing by and looking in at her.

She said a blunt instrument was pressed hard against her chest, causing considerable pain. At the same time, something was encircling her throat - and each time she tried to talk, she was choked into silence. Elaine cried softly at times under hypnosis.

"Something is pressing on my throat! Like hands, all over, all around...I see shadows as they pass by...pressure on my chest...they won't let me breathe! I can't get away!"

Louise Smith said she was in a "hot, dark" place and something was placed over her face. She begged the beings to let her see them, and once she was allowed to look - but quickly closed her eyes because whatever she saw was frightening. Even under hypnosis Louise can't remember what the beings looked like.

Reliving her experience hypnotically, Louise gasped out: "Help me, Lord, please!... (sobbing)... It's so dark... I'm scared. Get that off my face... let go my arm... I want to get up but I can't..." At one point she cried out: "Please, I can't

do NO MORE!...I'm so weak...I want to die! Please don't (sobbing)...Don't touch me!" And later: "Can I go home now? (smiling)...I'm going fast, so fast!...I see a light...it's a street light!"

Mona Stafford remembered lying on a bed in what seemed to be an operating room, her right arm pinned down by some invisible force, while three or four figures in white gowns sat around her bed. She doesn't recall their features.

Mona believed she was being tortured. She said that once her eyes felt as though they were being jerked out of her head, and another time her stomach felt as if it were being blown up like a balloon.

"My head hurts, my eyes hurt so bad..." she said.... "I see an eye...it's kinda like crystal...it just bursts out into light or something...My hand feels like it's tied down...it's hurting, it's numb..."

At one point she screamed: "Ooh! He's coming at me!...Ooh, they're pulling at me, they're pulling my feet! My feet are being bent backwards. Twisted. I CAN'T TAKE NO MORE!"

The women were given lie detector tests by Detective James Young, senior polygraph examiner for Lexington, Kentucky, Police Dept., and vice-president of the state polygraph association. Afterwards, Young said in a signed statement:

"It is my opinion that these women actually believe they did experience an encounter."

Dr. Sprinkle, who hypnotised all three women twice, added: "It is quite obvious that these women have specific impressions which indicate to them that they were being observed and handled by strange beings. In my opinion, it would be very difficult if not impossible for these women to fake their impressions. The impressions during the 'loss-of-time' experience are similar to those of other UFO witnesses who apparently have experienced abduction and examination."

Sheriff Bill Norris of Lincoln County, where the women saw the UFO, told the ENQUIRER that during January there had been "a number of UFO sightings in the county."

**\*ANALYSIS BY CNK:** Case after case has been brought to the attention of this magazine of persons being examined by UFO beings. The questions are now, WHY do they KEEP ON DOING IT, unless of course IT IS NOT THE SAME UFO and is in fact OTHER CRAFT who do not know what we look like inside or out, and come to examine a specimen or two? As it is near torture for the victims, all I can say is, they must have VERY PRIMITIVE MEDICAL EQUIPMENT. I mean, at least we have x-ray machines!

OTHER PEOPLE'S MAGAZINES. CNK takes a look at FORESIGHT.

Written by John Barklam and shortened due to space.

### FORESIGHT

The birth of FORESIGHT as a magazine began in summer of 1970 and being rather amateurish was sold mainly to friends and relatives. It began because of a deep interest in UFO's. FORESIGHT was a vehicle whereby the knowledge acquired could be published and presented to the public. Later with co-editor, and later my wife, the subject became more broader, to embrace psychic phenomena and the like, and also a desire to help remedy the problems of the world, towards a lasting peace, and help humanity to develop a more spiritual attitude and greater concern for the rest of his race on Earth. As we were very anxious to express this new spiritual awareness around the world, we began the long and expensive job of promoting the magazine around the world. We found however some folk who said they wanted peace and "wouldn't it be nice etc.", as soon as the time came for them to demonstrate their ideals and spend some money working for peace, they faded silently into the background. Talking was one thing, but action was another. It's been the same problem today, galvanising people into action and away from a football match on T.V. This is not an easy thing to do.

There is general apathy towards violence in the world. Too many accept it saying: "What can I do?" When told what to do about it, it is too much trouble. However, the fight goes on and FORESIGHT is gaining some small ground, although support for its ideals is STILL not sufficient to influence political events to any substantial degree but the seeds are there awaiting germination.

Too many people tend to pass the responsibility for the state of the world onto God, etc., over which they have no control. We are trying to say that they CAN influence their own futures and we have gone to great lengths to point this out. But we are ignored, by some, as if they actually want to keep the world as it is. Some are waiting for some great Super Being to put the world right, but we are saying that you, each individual has the power to do great things in the world, by using the tremendous forces that await you.

So from our early days of interest in UFOs etc., we were set on this path leading deep into the world's troubles and individual troubles. We endeavour therefore to speak out against inhuman acts. Time and again we have said, the WORLD IS OUR INDIVIDUAL RESPONSIBILITY, and change will only come about if you are willing to work for it. Until that happens, FORESIGHT will remain a part of society and work in the channels that exist. UFO groups etc. can play their part in this great scheme of things to come.

The time has come that the revelations of Our Lord Jesus Christ are to be made with the book, 'My Truth', which He has dictated and is now releasing to the world. For, as the Universal light of the Christ has now risen within this book and within the disciple to whom this book was dictated, the Way into the Light of the Father is now known. Even as there are now countless disciples who have followed the teachings given by the Lord, and all who have experimented with this book have found the light within their own souls, which leads one into the Christ Light; even as Jesus Himself has taught. Even as no man, neither any woman comes into the Light of the world, which Jesus portrayed as he was among His own disciples two thousand years ago.

And great, will be man's illumination as he meditates on the LORD, the ATHOOR of the book, "My Truth," as he reads this book. For the light of God is within this book even as it was dictated by Jesus, himself as his own light was flowing to form the words which were given.

This book will be sent to all who desire a copy. Send bank cheque for £2.50 to:
